

COOLING SOLUTIONS

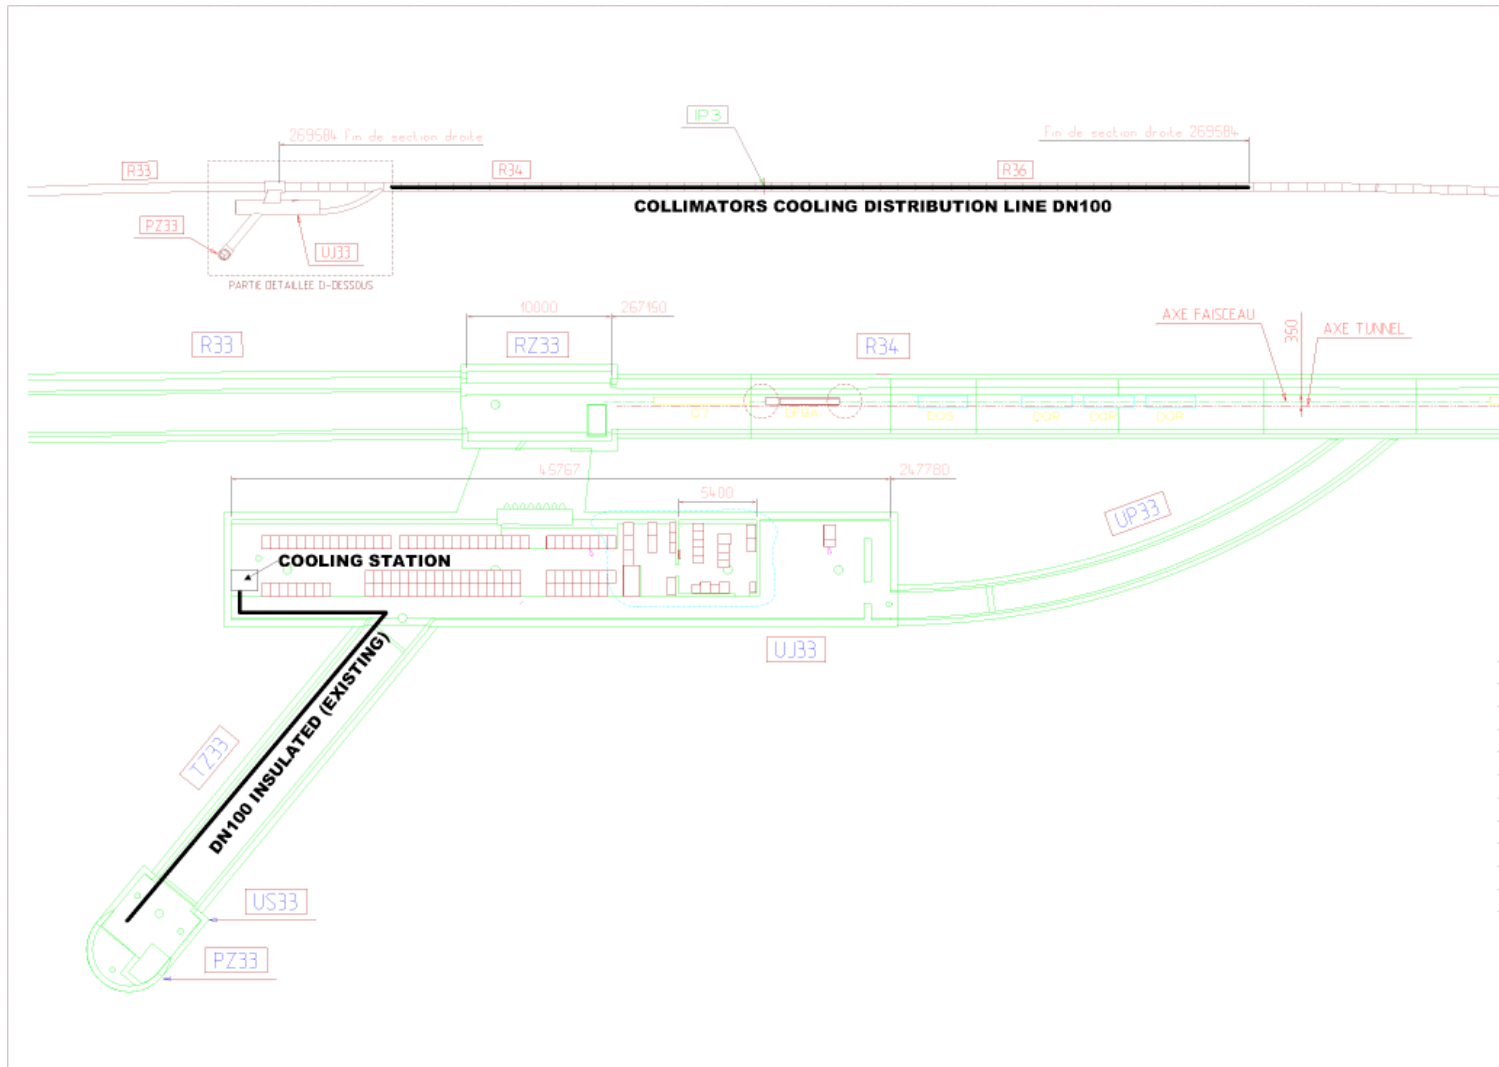

- 1 Cooling stations in UJ33 and UJ76 connected to chilled water. Independent circuit, $T < 15$ C.
- 2 Connection to Demineralised water distribution line in the tunnel. No independent circuit, no cooling station, $T > 27$ C
- 3 Connection to raw chilled water coming from the surface. No independent circuit, no cooling station, $T < 15$ C.
- No cooling station means no integration problems in the machine a priori.
